

## Racohi Wet Blast

Couto Maquinaria had designed a new product line for reduce dust in blasting jobs.

### Water-Jet Venturi Blast Nozzle RWJ

- High performance wet blast Venturi blast nozzle.
- Mixs water into abrasive/air stream before it exits the nozzle.
- Reduces dust caused by blasting process.
- Can be used as a simple dry blasting nozzle too.
- Requires 0.75 to 5.5 liters/min. depending on level of dust suppression.
- Water pressure: 2 to 4 bar.

### Water Ring

- Low cost device to reduce the dust caused by blasting process.
- Fits easily to standard blast nozzles with screws.
- Mixs water into abrasive/air stream before it exits the nozzle.
- Fits all standard blast nozzles. Max. outside nozzle diameter: 40 mm.
- Requires 0.75 to 5.5 liters/min. depending on level of dust suppression.
- Water pressure: 2 to 4 bar.

### Wet Blast Attachment

- Internal mixing device to dust suppression.
- Higher performance rates respect water rings systems .
- Water flow regulator, allows to adjust the water volume.
- Fits RNH-2/50 large thread nylon nozzle holders and standard blast nozzles.
- Water pressure: 2 to 4 bar.

## Products & services

Blasting Equipments  
 Nozzles & nozzle holders  
 Hoses & couplings  
 Lightfing systems  
 Wet blasting  
 Blasting without dust – Vacuumblast  
 Waterjetting sytem  
 Vacuum recovery equipments  
 Dust colectors  
 Dehumidifiers  
 Blasting cabinets  
 Internal pipe blasting equipments

Airless painting equipments  
 Paint hoses & couplings  
 Dual component systems  
 Internal pipe coating  
 Low pressure painting equipments  
 Personal protection  
 Measurement instruments
