

EDUCTOMATIC

Eductomatic Racohi are designed for a simultaneous blasting process & abrasive recovery without dust. Easy handle & highly efficiently equipment for low production inside installation.

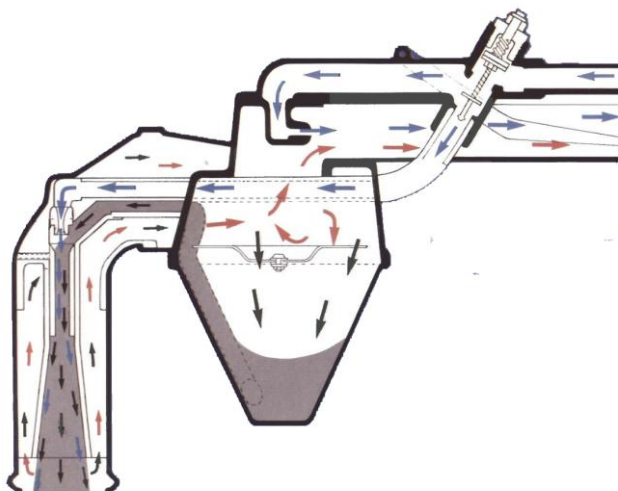

EDUCTOMATIC RACOHI

Eductomatic Racohi is a portable, light weight, without moving parts & reduced dimension which meets double functions of blasting & recovering abrasive recyclables. It is recommendable for elimination of oxide, paint & cleaning surfaces with strange elements. The surface after treatment is ready for posterior applications such as anit-corrosive paint, metallization or plastic paint. With the light weight (3,5 kg), is easy handle.

In conclusion, Eductomatic Racohi is excellent for reparations & maintenance jobs.

CHARACTERISITICS:

- The genuine design of the Eductomatic nozzle, is capable to blast in limited área and to any direction.
- Venturi nozzle provides a mayor impact and more blasting efficiency, obtaining an uniform result.
- Production capacity is 2-5 m²/h. For welding joints approximately 5 m. per minute.
- Supplied with different sizes & shapes of brushes for blasting a complexly surface.
- Due to the unique injector tube, the air consumption is very low: 1.5 m³/h: (2,55 cfm)
- Working pressure recomendable: 6-7 bar.
- Using with air hose of 1/2" (13mm) or 3/4" (19mm).
- Abrasive size recomendable: from 40 upto 100 mesh.

Short distance between the abrasive hopper & the surface for blasting reduces the pressure loss & obtain more effective blasting result. Can apply reciclable abrasive such as aluminium oxide.

Eductomatic is a dustfree blasting equipment. All abrasives & residues are collected back due to the air movement as picture shown. Abrasive is separated by a cyclonic chamber & is transported back to the hopper again.

CONTENT:

Supplied with a wooden portable box which contains all necessary accessories for a dustfree blasting.

- Equipped with a standard nozzle, in injector tube & dust bag.
- Medium tube (1 piece) & different adapters & brushes for edges, corners, etc. (7 pieces)
- Hose for dust evacuation.
- User manual.

Product & services

Blasting Equipments
Nozzles & nozzle holders
Hoses & couplings
Lighting systems
Wet blasting
Blasting without dust – Vacuumblast
Waterjetting system
Vacuum recovery equipments
Dust collectors
Dehumidifiers
Blasting cabinets
Internal pipe blasting equipments

Airless painting equipments
Paint hoses & couplings
Dual component systems
Internal pipe coating
Low pressure painting equipments
Personal protection
Measurement instruments
