

CARBON MONOXIDE MONITORS

Racohi carbon monoxide monitors are designed & manufactured with high quality materials to be the most compact and reliable in the industry.

RACOHİ CARBON MONOXIDE MONITORS

Designed to monitor breathing air for carbon monoxide contamination from a compressed air source. This monitor meets the standard OSHA 29CFR 1910.134 (d) (2) (ii) for carbon monoxide monitors.

Operation:

Compressed Air is supplied to the unit through the sampling hose where the air flows through a preset pressure regulator and a fixed orifice flow restrictor. This system delivers a continuous flow of compressed air into the sensor chamber. The monitor continuously analyses the air and displays a CO reading in ppm and the temperature of the compressed air.

The monitor must be supplied with Grade-D air and must be free of oil and water to prevent contamination of the sensor

Characteristics:

- Easy to use.
 - 1- Connect the power source.
 - 2- Connect the air supply.
 - 3- Switch on.And configuration in each use is not necessary.
- Traceability: via PC, this feature provides users with the ability to review data which has been recorded and stored. (information on CO levels, temperature, alarms, calibration & date & time.)
- Supply with an adaptor of 12V (110/240V), software & USB cable.
- The monitor has a built alarm to alert carbon monoxide CO.
- The monitor is designed to operate in temperature ranges -10°C to 60°C and humidity levels between 5% a 99% (no condensation).

Products & services

Blasting Equipments
Nozzles & nozzle holders
Hoses & couplings
Lighting systems
Wet blasting
Blasting without dust – Vacuumblast
Waterjetting system
Vacuum recovery equipments
Dust collectors
Dehumidifiers
Blasting cabinets
Internal pipe blasting equipments
Chorroado interior de tuberías

Airless painting equipments
Paint hoses & couplings
Dual component systems
Internal pipe coating
Low pressure painting equipments
Personal protection
Measurement instruments
